

Assembly Instructions Triangular Roll Storage Box

1. Lay box flat, with creases facing up.
2. Fold flaps A up at 90 degrees, still holding flaps A, bring flaps B up 90 degrees.
3. Still holding, rotate panel C up until flaps A lay flat on panel D.
4. Repeat process with flaps F and E, rotating flaps F around flaps B and lock tabs into slots K.
5. Rotate panels G and H up over C, tucking flaps H inside box, and flaps I into slots created by flaps F.
6. Lock two small tabs into slots L.
